MEDIA RELEASE

The Services Union Welcomes The Development Of Borumba Dam

The Palaszczuk Government announcement of the proposed investment in developing a pumped storage Hydro power station at Borumba Dam is the sort of vision we are looking to Governments to provide.

The Services Union welcomes the announcement of this major project which will deliver a significant boost to generated renewable energy and at the same time maintain Queensland's public ownership of electricity generating assets.

Secretary of the Services Union Neil Henderson said;

"We know that it was the efficient operation of publicly owned assets include the pump storage Hydro station at Wivenhoe that enable Queensland's electricity distribution network to recover so quickly from the outage caused by the turbine failure at Callide a fortnight ago.

Projects like Borumba Dam show the way forward for our power industry and one of the pathways necessary for a just transition for our highly skilled workforce."
